PROFESSIONAL SUMMARY

Results-driven Software Engineer with strong experience in full-stack development and data-driven applications. Skilled in building scalable web and mobile solutions using modern technologies like React, Next.js, Node.js, and Laravel. Proven ability to design efficient systems, integrate APIs, and deliver user-centric products. Adept at problem-solving, collaboration, and continuous learning, with hands-on experience across both development and infrastructure domains.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, Laravel, PHP

Databases: MongoDB, MySQL, PostgreSQL, Oracle

Tools & Platforms: Git, Redux Toolkit, Vercel, Railway, phpMyAdmin, TOAD, Oracle Enterprise Manager

Other Skills: REST API Integration, Database Management, UI/UX Development

PROFESSIONAL EXPERIENCE

Software Developer

May 2026 – Present

Selenite Care, Dhaka

- Designing and building a production-ready full-stack web application from the ground up using Next.js, TypeScript and PostgreSQL, deployed on Vercel with a cloud database backend
- Architecting secure, multi-role authentication and access control for distinct user types with session management and route-level protection
- Developing customer-facing workflows spanning data intake, file uploads, and personalized recommendations
- Integrating multiple payment gateways to support both international and local payment methods
- Building an inventory and order management system supporting multiple fulfillment and payment options
- Developing role-specific admin dashboards with analytics, real-time notifications and data export capabilities
- Implementing transactional email systems for user lifecycle notifications
- Optimizing database performance through indexing, pagination and caching strategies; managing schema migrations across environments
- Setting up CI/CD pipelines with automated preview and production deployment

Software Developer

Apr 2024 – May 2025

SRS Software & Tech, Dhaka

- Designed and developed a complete appointment booking system with real-time doctor availability tracking
- Implemented email and SMS notification systems for appointment confirmations
- Built responsive and user-friendly UI using Laravel Blade templates
- Integrated REST APIs using Node.js and MongoDB for dynamic data handling
- Managed and structured backend databases for optimized performance and scalability
- Ensured seamless integration between frontend and backend systems
- Followed MERN stack architecture to develop scalable and maintainable components
- Collaborated cross-functionally to improve overall user experience and system efficiency
- Contributed to UI/UX improvements and asset design to enhance product usability

Intern – IT (Infrastructure)

2022

United Commercial Bank Ltd. (UCBL), Dhaka

- Managed Oracle databases and ensured data integrity
- Created network infrastructure diagrams using Microsoft Visio
- Used TOAD for Oracle for database optimization
- Monitored systems using Oracle Enterprise Manager (OEM 13.9)

- Handled backup and recovery using Dell EMC NetWorker

Intern – IT (Tech Team)

2022

International University of Scholars, Dhaka

- Assisted IT operations and system maintenance
- Worked with Adobe tools for multimedia tasks
- Supported networking, device setup, and system configuration

PROJECTS

Selenite Care - Membership-Based Skincare Consultation E-commerce Platform

- Built a full-stack platform using Next.js 16, TypeScript, Tailwind CSS, PostgreSQL and Prisma ORM, deployed on Vercel with Supabase as the cloud database
- Architected a multi-role auth system (Client, Doctor, CRM, Admin) with NextAuth v5, JWT sessions and email verification
- Built a three-tier membership system (Signature, Crystal, Platinum) with automated activation, expiry count-downs, upgrade flows and manual bKash/bank transfer verification
- Developed an appointment booking system with doctor specialization filters, availability-based scheduling and a 2-hour booking cutoff
- Implemented a digital skin consultation workflow with Cloudinary photo uploads, doctor diagnosis notes and live product search across 359 products
- Integrated Stripe for international payments and a bKash merchant flow for local transactions; built a full inventory and order system with bKash, bank transfer and cash-on-delivery
- Built Admin/Doctor/CRM/Client dashboards with booking and membership analytics, real-time notifications and CSV export
- Set up Resend for transactional emails (bookings, membership activation, renewals, birthdays, order updates)
- Wrote 20+ Prisma migrations across local and Supabase environments; configured GitHub/Vercel CI/CD with preview deployments

BrandSync AI - Integrated Marketing Intelligence OS (2026)

- Built a complete authentication system with Supabase, including email/password, Google and Facebook OAuth (PKCE flow), post-login onboarding and protected dashboard routes
- Integrated Google Search Console, GA4 and YouTube APIs via OAuth 2.0 to surface real-time channel performance, keyword rankings and video metrics
- Designed 12+ Supabase tables with RLS policies and auto-provisioning triggers, and built Audience Intelligence and Campaign Automation modules combining live GA4 data with AI recommendations (Groq/LLaMA 3.3-70B)
- Implemented brand analysis via Firecrawl web crawling with server-side processing (TanStack Start SSR), deployed on Cloudflare Pages with production OAuth and SSR/client hydration handling
- **Tech:** TanStack Start, Supabase, PostgreSQL, Groq (LLaMA 3.3-70B), Firecrawl, Cloudflare Pages, OAuth 2.0

The Multiverse - Social Media Platform

- Built full-stack application using Next.js, Prisma, Clerk Auth
- Features: user profiles, posts, likes, follow system
- Implemented scalable backend and modern UI
- Tech: Next.js, TailwindCSS, REST APIs

LAMAPIN - Image Sharing Platform

- Developed Pinterest-like app with real-time updates
- Features: image upload, boards, comments, likes
- Integrated Sharp + ImageKit CDN for image processing
- Tech: React.js, Node.js, MongoDB

EDUCATION

M.Sc in Computer Science

Apr 2023 – July 2024

American International University-Bangladesh

CGPA: 3.73 / 4.00

B.Sc in Computer Science & Engineering

Jan 2019 – Dec 2022

American International University-Bangladesh

CGPA: 3.69 / 4.00

PUBLICATION

NoSQL Database Selection Process: An Integrated Proof of Concept and Comparison for Targeted Document Store Databases IEEE, March 2025

SENTRY-AI: A Privacy-Preserving, Human-in-the-Loop Framework for Educational Resilience and Multimodal Detection of AI-Enabled Cyberbullying in U.S. Schools Springer, July 2026

CERTIFICATIONS

CloudCamp BD AI Hackathon Fest — Certificate of Participation, 2026

Responsive Web Design – freeCodeCamp

Frontend Developer (React) – HackerRank
